

## Pacific Resources Creates Buzz With New Zealand Bee Products

Pacific Resources sources the best of New Zealand bee products, direct from producing beekeepers that take pride in producing excellent products.

Manuka honey is only found in New Zealand and has special properties not found elsewhere. Maunka honey is the special honey that is used for digestive conditions and skin conditions from burns to wounds.

As a preventive, take one teaspoon one to

three times a day to help the immune system. Manuka honey is the perfect ingredient to help tame cough and cold symptoms, and is in the Lemon & Manuka Honey Lozenges, Cough Elixir and Throat Spray that are free of Propylene Glycol. These items also contain New Zealand active propolis with the highest level of flavonoids (Vitamin P).

Pacific Resources imports other exclusive New Zealand products that include sea salt –

solar and wind dried for 13 to 20 months – that still contains all the natural trace elements necessary to promote good sleep, good blood pressure and will help balance blood sugar. It is pure and clean without free-flowing or anti-caking agents—the only ingredient is sea salt.

Beware of sea salts that are just sodium chloride and may contain additives. These sodium chloride-only sea salts are good for a healthy lifestyle.

Pacific Resources has the largest selection of Bio Active, 5+ - 25+, and UMF Manuka

honey 5+ - 18+, in one-pound and 2.2-pound sizes. There is also a wide selection of native New Zealand honeys, including organic west coast honey, blue borage, Rewarewa and multiflora that contains 10 percent manuka honey. Some New Zealand companies no longer have their own beehives and buy honey from many producers to

blend the Manuka.

Check out the complete line at [www.shopri.com](http://www.shopri.com), or stop by Expo East booth 953 and see the new Manuka honey and propolis soap.

## Mina's Purely Design Creates New Approach To Gluten-Free Baking

One mix per recipe or one mix for all recipes?

Gluten free?

They've got you! You have to buy the mix for the pancake, another one for the cookies and yet another one for the carrot cake—without even mentioning different mixes for each kind of bread. It is like having to go to the store and buy a new computer each time you want to use a different program.

How about just one computer that will support all of the applications you can dream of?

One mix for each class of recipes?

Mina's Purely Divine Inc. understood the problem and came up with three fundamental

mixes: A for all-purpose, B for breads and C for chocolate. Each one of these mixes corresponds with a growing number of recipes posted on Mina's website, including a decent number of vegan ones.

Mina Brustman, a sweet-looking Swedish grandma, was the chief cook and baker at a spiritual retreat center for more than 20 years until she became so allergic to wheat flour that if she touched it with her bare hands, her body would register an allergic reaction.

It took her almost two years, using her best intuition, research and a lot of trial and error, to come up with three non-allergenic formulas for all of her baking. Now, she can enjoy

her delicious bagels, cookies, chocolate cakes, moist breads, pizzas, brownies etc., fresh from her oven without any fear.

Brustman explains that she avoided the pitfalls of most mixes she tried. It is one thing to be gluten free, another one to be allergen free. Her mixes are made in a dedicated facility. They are free of wheat and GMO products, but also from barley, rye, oats, soy, corn, beans, bran, dairy, eggs, nuts, their crosses and derivatives. By weight, more than half of the ingredients are organic.

Now, Brustman is in business and has joined forces with a couple of people from the industry. She feels a form of responsibility to offer only irreproachable products to her fellow sufferers of acute allergies.

These mixes are good for schools and hos-

pitals to have, where one mix can be used for many things and the consumers are safe.

For the chef, it takes out the guessing work. For example, the chocolate cake can be done

either vegan, with or without eggs or dairy and it turns out right every time—moist, structured and with a deep chocolate flavor. Everybody is happy!

Her year-old company offers her products by mail order or online. Retail, food service or industrial packaging are available.

To meet Brustman and sample some of the delicious baked goods she brought from Stone Mountain, Ga., please visit booth 952. For more information, please go online to [www.MinasPurelyDivine.com](http://www.MinasPurelyDivine.com), email [xavier@minasgf.com](mailto:xavier@minasgf.com) or [yessie@minasgf.com](mailto:yessie@minasgf.com) or call 404-508-6222.

## M&J Dog Essentials Introduces Super Fast And Easy Dog Bathing With The FreshenUp Collection

M&J Dog Essentials, provider of all-natural, critically acclaimed dog grooming products, announced the launch of its new FreshenUp Collection, a Cleansing Treatment and Coat Tonic that can be used to “freshen up” your dog between baths.

The new products, after two years of intense development, complement the popular Essential Pack's complete shampoo and conditioning treatments, with two new, ultralight, easily applied products that do all the work of a bath in half the time.

The Cleansing Treatment and Coat Tonic were designed as quick and easy home treatments that keep dogs looking their best in between full grooming sessions. Ideal for both home groomers and discerning clients of professional groomers, FreshenUp Collection boasts all-natural ingredients and clean cucumber aromas to provide your dog with a clean, conditioned coat and fresh, just-out-of-the-bath scent.

Use the Cleansing Treatment, with its apply-friendly nozzle cap and refreshing

botanicals such as aloe extract, to effectively remove dirt and odor on all coat types in just 10 minutes for a clean and happy dog.

Follow with Coat Tonic, a conditioning mist for a sleek, soft dog coat.

M&J Dog Essentials recommends using FreshenUp Collection in between your Essential Pack grooming sessions to easily extend that “just-groomed look” and leave your dog smelling fresh between baths.

A family-run, Chicago-based company, M&J's all-natural concoctions have received glowing five-star reviews from dog owners around the country who rave about the value of the holistic products for their pampered

pets—all of which boast hand-picked ingredients, custom-blended flower essences, subtle scents and the perfect pH balance for dogs to create shiny, luxurious coats and healthy, moisturized skin.

M&J Dog Essentials was founded with a mission to ensure that all dogs have the

healthiest skin and coats possible. The company's all-natural products contain absolutely no harsh chemicals, no synthetic fragrances and are pH-balanced especially for dogs. M&J Dog Essential products are made proudly in the United States.

For more information, please visit M&J book 1338, go online to [www.mjdog.com](http://www.mjdog.com) or call 888-663-5682.

## World's Best Cat Litter Pleases Eco-Minded Consumers

Using a patented process that delivers outstanding odor control and quick clumping, World's Best Cat Litter™ is the natural choice of Earth-conscious pet owners who demand exceptional performance.

World's Best Cat Litter is pet-, people- and planet-friendly because it is the only litter that harnesses the naturally microporous nature of whole-kernel corn to trap nasty odors. You won't find another litter on the market like it.

All three of our quick-clumping formulas – Clumping, Multiple Cat Clumping and Scented Multiple Cat Clumping – are milled from a renewable resource and contain no

synthetic chemicals or additives. Our litters are biodegradable and all natural. Because our formulas aren't derived from mined or drilled materials, World's Best Cat Litter contains no silica dust and is safe for cats and owners. It's an uncompromising solution for pet owners who demand a natural product that is tough on odor and easy on the environment.

Because it is made from naturally absorbent corn, World's Best Cat Litter offers outstanding performance in a product that eco-minded consumers can feel good about.

All of our formulas quickly trap liquid, thus limiting wetness from seepage to the

bottom of the litter box. Because World's Best Cat Litter clumps on contact, pet owners deal with less mess and replace less litter after they scoop. Our natural solution is long-lasting, lightweight and easy to scoop! Cats love the soft texture of World's Best Cat Litter formulas.

One of the advantages of being made from milled corn is that World's Best Cat Litter disperses quickly in water, making it flushable and septic safe. Unlike other so-called flushable litters that recommend that you wait 20 minutes or more before you flush, all of our formulas can be flushed right away. World's Best Cat Litter allows you to be in and out in a snap. Job done!

World's Best Cat Litter delivers three for-

mulas to satisfy the needs of all earth-conscious pet owners. Our Clumping Formula is designed for single-cat households, while our Multiple Cat Clumping Formula offers a natural solution for homes with two or more

felines. Made with 100 percent all-natural scented lavender oil, our Scented Multiple Cat Clumping Formula is ideal for cat owners who prefer a scented litter with no artificial ingredients or perfumes. World's Best Cat Litter formulas are offered in seven-, 17- and 34-pound bags.

World's Best Cat Litter is manufactured by Kent Nutrition Group Inc., headquartered in Muscatine, Ia. Kent Nutrition Group is
